ABOUT FELIXPRINTERS

FELIXprinters is headquartered in IJsselstein, the Netherlands, and was established in 2010, since when it has established itself as one of only a very few 3D printing technology suppliers that has an understanding of the requirements of the market for 3D printers. FELIXprinters provides top-end, robust, reliable, and competitively priced 3D printing solutions for industry users.

Beyond the optimisation of its industrial range of printers, however, FELIXprinters has extensive engineering and R&D capabilities, which it is able to utilize to provide specific services in the development of tailor made, customised 3D printing platforms — working in partnership to produce new and innovative solutions.
